Directors' report

The directors of Ansva Insurance Limited submit herewith the annual financial report for the financial year ended 31 December 2008. In order to comply with the provisions of the Corporations Act 2001, the directors report as follows:

The names and particulars of the directors of the company during or since the end of the financial year are:

Mr Murray Baird

B.Arts, LLB

Chairman

Murray was appointed to the Board in 2002 and became the Chairman in January 2006. Murray has been senior partner and chairman of Moores Legal, Melbourne, Australia since 1985. His professional practice includes advising in corporations law and governance. He is a member of the Australian Institute of Company Directors, has been a director of a number of non listed public companies and is a regular writer, speaker and consultant on Corporate Governance issues for the Not for Profit sector.

Mr Bruce Harris

CA, CPA, ACIS

Director

Bruce was appointed to the Board in 2005. Bruce is a former insurance executive director with experience in financial management, strategy, governance, compliance and risk management and has been a director of a number of non listed public companies. He is currently Executive Officer of Ridley Melbourne Mission & Ministry College and involved at board level in the not for profit sector.

Mr David Harrison

FNZIM

Director

David has been a Board Member since 2001. David joined the New Zealand Board of Ansva Insurance in 1997, becoming Chairman in 2000. David has extensive experience in insurance. He is the former Chairman and Chief Executive of Marsh Ltd in New Zealand and the Pacific Islands and a member of the international team of Managing Directors, is Chairman of Aviation Co-operating Underwriters Pacific Ltd and has extensive interest at board level in the Charitable and Not for Profit sectors.

Dr Bronwyn Hughes

B.Arts, Dip Ed, Dip Mgt, D.B.A.

Director

Bronwyn became a Director in 2006. She has worked in both secular and Christian media for over 20 years including as a producer for ABC Radio National, as a presenter with FM103.2 and as Director of the Anglican Radio Unit. Bronwyn has also worked as the Communications Director with NCLS Research and as National Director for Mission Research and Development with the Bible Society. Currently she is employed as Leadership Research Fellow with Macquarie University Graduate School of Management, is the outgoing Chairman of the Willow Creek Association Australia and is Deputy Chair, Board of Management, Radio FM103.2.

Mr John Peberdy

ANZIIF (Snr Assoc) CIP

Director

John has been a Board member since 1997. John is the CEO of Ansva Insurance Ltd in Australia and New Zealand. He commenced with the company in Adelaide in 1973 and has held various senior management roles in Ansva Insurance since 1986. He was appointed CEO in May 1999. John is a Senior Associate of the Australian and New Zealand Institute of Insurance and Finance. He is a director of Global Interaction Australia and the Insurance Council of Australia.

Mr George Prescott

B.Arts, FCA

Director

George was appointed to the Board in 1999. George works for Ecclesiastical Group plc, originally appointed as Executive Director in 1995 and then in 2005 was appointed the Deputy Group Chief Executive. He has worked in the group for over 20 years and is primarily responsible for the Group's investment and accounting activities. He is a Director of Mapfre Re (Spain) and JP Morgan Cazenove Pension Trustee Limited.

Mr William Graham Shearn

B.Arts, FCII

Director

Graham has been on the Board since 2006. He is the Group Development Director of Ecclesiastical Insurance Group plc and has been closely involved with Ansva Insurance since its acquisition by Ecclesiastical in 1998. Graham has worked in the insurance industry throughout his professional career and is a Chartered Insurer and Fellow of the Chartered Insurance Institute.

Mr Jeffrey Thomas

B.Ec, M.B.A.,FCA.
Director

Jeffrey has been a Board Member since 2004. He has been the Chairman of Jeffrey Thomas & Partners, Chartered Accountants, since 1981. His professional time is principally related to providing strategic and organisational advice to a wide range of businesses. He has held board positions previously with a diverse range of businesses and organisations, including an insurance broker.

Mr Michael Tripp

B.Sc., ARCS, FIA
Director
Group Chief Executive

Michael has been on the Board since 2007. He is the Group Chief Executive, Ecclesiastical Group plc based at the Head Office in Gloucester, UK. Prior to commencing with Ecclesiastical, Michael was a partner with the global professional services practice, Ernst & Young and Watson Wyatt. A qualified actuary, he has more than 30 years experience in the insurance industry

The 9 above named directors held office during and since the end of the financial year unless otherwise stated.

Principal activities

The Group's principal activities in the course of the financial year consisted of insurance underwriting and investment.

There have been no significant changes in the activities of the consolidated entity during the year ended 31 December 2008.

Review of operations

Despite the doom and gloom in the economy, Ansvar Insurance is pleased to report an increase in profit after tax on a consolidated basis from \$5.9m in 2007 to \$8.7m in 2008. The conservative investment policy adopted by our Board delivered a record investment result to more than offset the deterioration in underwriting performance.

Gross Written Premium increased by 7.8% from \$131.7m to \$142.0m. This is particularly pleasing given the softness of the market for much of the year. At the same time, claims expense increased by 12.4% from \$95.3m to \$107.1m. This tested the robustness of our reinsurance purchase. The quality of our program enabled us to achieve one of our major reinsurance goals which is to reduce volatility.

The synergy in strategy within the Ecclesiastical Group has further developed during 2008. All parts of the Group are now engaged in the development of specialist products in the core customer segments of faith, education, care, community service organisations and heritage properties.

We have undertaken significantly more customer and distribution partner research this year to better understand the needs of supply chain for our products. This has provided us with new insights into the expectations of those who purchase and distribute our products.

APRA changes to capital charges on reinsurance and investments have been introduced during 2008. Management and the Board have worked to ensure we manage through this change effectively.

We also fulfilled our goal to assist in the development of the youth of Australia and New Zealand through the provision of Community Education Program grants. This program was formalised in New Zealand in 2008, assisted by a generous grant to our major customer group from the ultimate owner of the Ecclesiastical Group, All Churches Trust Ltd (UK).

The landscape at the end of 2008 looked very different to the start. The world faces many challenges as it works its way through a very stormy financial crisis. The role of insurance at such times becomes even more important.

Ansvar Insurance is a long term participant in the marketplace and is well placed to deal with the difficulties currently at hand through adopting prudent policies and practices in the past. The maintenance of a sound capital base has been at the forefront of our practices and this will stand us in good stead.

Directors' report (continued)

Changes in state of affairs

During the financial year there was no significant change in the state of affairs of the consolidated entity other than that referred to in the financial statements or notes thereto.

Subsequent Events

There has not been any matter or circumstance, other than that referred to in the financial statements or notes thereto, that has arisen since the end of the financial year, that has significantly affected, or may significantly affect, the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.

Future Developments

Disclosure of information regarding likely developments in the operations of the consolidated entity in future financial years and the expected results of those operations is likely to result in unreasonable prejudice to the consolidated entity. Accordingly, this information has not been disclosed in this report.

Dividends

In respect of the financial year ended 31 December 2008, the directors have recommended the payment of a dividend of \$3.123 million to the parent entity (2007: \$2.995 million).

Directors' meetings

The following table sets out the number of directors' meetings (including meetings of committees of directors) held during the financial year and the number of meetings attended by each director (while they were a director or committee member). During the financial year, 5 board meetings, 5 audit committee meetings, 5 investment committee meetings, 1 community education program grants meeting and 5 nominations and remuneration committee meetings were held.

Directors' meetings

Indemnification of officers and auditors

During the financial year, the company paid a premium in respect of a contract insuring the directors of the company (as named above), the company secretary and all executive officers of the company and of any related body corporate against a liability incurred as such a director, secretary or executive officer to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The company has not otherwise, during or since the financial year, indemnified or agreed to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as such as officer or auditor.

Auditors' Independence Declaration

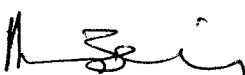

The auditors' independence declaration is included on page 6 of the financial report.

Rounding Off Of Amounts

The company is a company of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and in accordance with that Class Order amounts in the directors' report and the financial report are rounded off to the nearest thousand dollars.

Signed in accordance with a resolution of the directors made pursuant to s.298(2) of the Corporations Act 2001.

The Board of Directors
Ansvr Insurance Limited
Level 18, 303 Collins Street
Melbourne, VIC 3000

23 April 2009

Dear Directors

Ansvr Insurance Limited

In accordance with section 307C of the Corporations Act 2001, I am pleased to provide the following declaration of independence to the directors of Ansvr Insurance Limited.

As lead audit partner for the audit of the financial statements of Ansvr Insurance Limited for the financial year ended 31 December 2008, I declare that to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

Yours sincerely

Independent audit report to the members of Ansvar Insurance Limited

Report on the Financial Report

We have audited the accompanying financial report of Ansvar Insurance Limited, which comprises the balance sheet as at 31 December 2008, and the income statement, cash flow statement and statement of changes in equity for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the year's end as set out on pages 9 to 54

Directors' Responsibility for the Financial Report

The directors of the company are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Act 2001. This responsibility includes establishing and maintaining internal control relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that compliance with the Australian equivalents to International Financial Reporting Standards ensures that the financial report, comprising the consolidated financial statements and notes complies with International Financial Reporting Standards.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

Liability limited by a scheme approved under Professional Standards Legislation.

Member of Deloitte Touche Tohmatsu

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Auditor's Independence Declaration

In conducting our audit, we have complied with the independence requirements of the Corporations Act 2001.

Auditor's Opinion

In our opinion:

- (a) the financial report of Ansvr Insurance Limited is in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the company's and consolidated entity's financial position as at 31 December 2008 and of performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Regulations 2001; and
- (b) the consolidated financial statements and notes also comply with International Financial Reporting Standards as disclosed in Note 1.

DELOITTE TOUCHE TOHMATSU

Melbourne, 23 April 2009

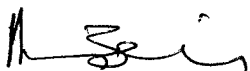

Directors' declaration

The directors declare that:

- a. in the director's opinion, there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable;
- b. in the director's opinion, the attached financial statements and notes thereto are in accordance with the Corporations Act 2001, including compliance with accounting standards and giving a true and fair view of the financial position and the performance of the consolidated entity.

Signed in accordance with a resolution of the directors made pursuant to s.295(5) of the Corporations Act 2001.

On behalf of the Directors

Notes to the financial statements for the financial year ended 31 December 2008

1. Significant accounting policies

Statement of Compliance

The financial report is a general purpose financial report which has been prepared in accordance with the Corporations Act 2001, Accounting Standards and Interpretations, and complies with other requirements of the law.

Accounting Standards include Australian equivalents to International Financial Reporting Standards ('A-IFRS'). Compliance with the A-IFRS ensures that the consolidated financial statements and notes of the consolidated entity comply with International Financial Reporting Standards ('IFRS').

The financial report includes separate financial statements of the company and the consolidated financial statements of the Group. The financial statements were authorised for issue by the directors on 23 April 2009.

Basis of Preparation

The financial report has been prepared on the basis of historical cost, except for the revaluation of certain non-current assets and financial instruments. Cost is based on the fair values of the consideration given in exchange for assets.

All amounts are presented in Australian dollars. The company is a company of the kind referred to in ASIC Class Order 98/0100, dated 10 July 1998, and in accordance with that Class Order amounts in the financial report are rounded off to the nearest thousand dollars, unless otherwise indicated.

Accounting policies are selected and applied in a manner which ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported.

The following significant accounting policies have been adopted in the preparation and presentation of the financial report:

a. Principles of general insurance business

An insurance contract is defined as a contract under which one party (the insurer) accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder.

b. Premium revenue

Direct premium comprises amounts charged to the policyholder or insurers including fire service levies, but excluding stamp duties collected on behalf of third parties. The earned portion of premiums received and receivable, including unclosed business, is recognised as revenue. Premium is treated as earned from the date of attachment of risk. Premiums on unclosed business are brought to account by reference to the previous year's premium processing delays with due allowance for any changes in the pattern of new business and renewals.

The pattern of recognition of income over the policy period is based on time, which closely approximates the pattern of risks underwritten. Unearned premium is determined by apportioning the premiums written in the year, after deducting reinsurance.

c. Claims

Claims expense and a liability for outstanding claims are recognised in respect of all business written. The liability covers claims reported but not yet paid, incurred but not reported claims ("IBNR") and the anticipated direct and indirect costs of settling those claims. Claims outstanding are assessed by reviewing individual claim files and estimating changes in the ultimate cost of settling claims with IBNRs and settlement costs using statistics based on past experience and trends.

No discounting has been applied to outstanding claims for 'short tail' classes as the impact is not significant. The liability for outstanding claims for 'long-tail' classes is measured as the present value of the expected future payments. These payments are estimated on the basis of the ultimate cost of settling claims, which is affected by factors arising during the period to settlement such as normal and 'superimposed' inflation. The expected future payments are discounted to present value at the balance date using risk free rates.

d. Outwards reinsurance

Premium ceded to reinsurers is recognised as an expense in accordance with the pattern of reinsurance service received. Accordingly, a portion of outwards reinsurance premium is treated at the balance date as a prepayment.

e. Reinsurance and other recoveries receivable

Reinsurance and other recoveries receivable on paid claims, reported claims not yet paid and IBNRs are recognised as revenue. Recoveries receivable are assessed in a manner similar to the assessment of outstanding claims.

f. Acquisition costs

Acquisition costs incurred in obtaining insurance contracts are deferred and recognised as assets where they can be reliably measured and where it is probable that they will give rise to revenue that will be recognised in the Income Statement in subsequent reporting periods. Deferred acquisition costs are measured at the lower of cost and recoverable amount. Deferred acquisition costs are amortised systematically in accordance with the expected pattern of the incidence of risk under the general insurance contracts to which they relate. This pattern of amortisation corresponds to the earning pattern of the corresponding premium revenue.

g. Fire brigade and other charges

A liability for fire brigade and other charges is recognised on business written to the balance date. Levies and charges payable by the company are expensed on the same basis as the recognition of premium revenue, with the portion relating to unearned premium being recorded as a prepayment.

h. Unearned premium liabilities

Unearned premium liability is determined by apportioning the premium written over the period from date of attachment of risk to the expiry of the policy term.

Liability adequacy testing is performed in order to recognise any deficiencies in the Income Statement arising from the carrying amount of the unearned premium liability less any related deferred acquisition costs and intangible assets not meeting the estimated future claims under current insurance contracts.

The estimated future claims under current insurance contracts are measured using the present value of the expected cash flows relating to future claims and associated expenses (discounted using a risk free discount rate) plus an additional fair value risk margin to reflect the inherent uncertainty of those estimated cash flows.

Liability adequacy testing is performed at the level of a portfolio of contracts that are subject to broadly similar risks and are managed together as a single portfolio.

Notes to the financial statements for the financial year ended 31 December 2008

1. Significant accounting policies (continued)

i. Financial Assets

In accordance with AASB 1023 *General Insurance Contracts*, the consolidated entity is required to measure financial assets held to fund insurance provisions at fair value through profit or loss.

AASB 139 *Financial Instruments: Recognition and Measurement* has an option to measure all financial assets at fair value through profit or loss. Shareholders' funds constitute a group of financial assets which are managed, and their performance evaluated, on a fair value basis in accordance with the consolidated entity's documented investment strategy. Information prepared on this basis is provided to the consolidated entity's senior management. The consolidated entity has therefore elected to measure all financial assets that do not fund insurance provisions at fair value through profit or loss upon initial recognition and at the date of transition to AIFRS.

Fair value is determined by reference to the closing bid price of the instrument at balance sheet day.

Loans and receivables

Loans and receivables are measured at amortised cost using the effective interest method less impairment.

j. Financial instruments issued by the company

Debt and equity instruments

Debt and equity instruments are classified as either liabilities or as equity in accordance with the substance of the contractual arrangement.

Transaction costs on the issue of equity instruments

Transaction costs arising on the issue of equity instruments are recognised directly in equity as a reduction of the proceeds of the equity instruments to which the costs relate. Transaction costs are the costs that are incurred directly in connection with the issue of those equity instruments and which would not have been incurred had those instruments not been issued.

Interest and dividends

Interest and dividends are classified as expenses or as distributions of profit consistent with the balance sheet classification of the related debt or equity instruments.

k. Property, plant and equipment

Owner occupied land and buildings are measured at fair value. Fair value is determined on the basis of an independent valuation prepared by external valuation experts, based on discounted cash flows or capitalisation of net income (as appropriate). The independent valuation is carried out every three years. The fair values are recognised in the financial statements of the consolidated entity and are reviewed at the end of each reporting period to ensure that the carrying value of land and buildings is not materially different from their fair values.

Any revaluation increase arising on the revaluation of land and buildings is credited to the asset revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognised as an expense in profit or loss, in which case the increase is credited to the income statement to the extent of the decrease previously charged. A decrease in carrying amount arising on the revaluation of land and buildings is charged as an expense in profit or loss to the extent that it exceeds the balance, if any, held in the asset revaluation reserve relating to a previous revaluation of that asset.

Depreciation on revalued buildings is charged to profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the asset revaluation reserve, net of any related deferred taxes, is transferred directly to retained earnings.

Plant and equipment and leasehold improvements are stated at cost less accumulated depreciation and impairment. Cost includes expenditure that is directly attributable to the acquisition of the item. In the event that settlement of all or part of the purchase consideration is deferred, cost is determined by discounting the amounts payable in the future to their present value as at the date of acquisition.

Depreciation is provided on property, plant and equipment, including freehold buildings but excluding land. Depreciation is calculated on a straight line basis so as to write off the net cost or other revalued amount of each asset over its expected useful life to its estimated residual value. Leasehold improvements are depreciated over the period of the lease or estimated useful life, whichever is the shorter, using the straight line method. The estimated useful lives, residual values and depreciation method is reviewed at the end of each annual reporting period.

The following estimated useful lives are used in the calculation of depreciation:

<i>Buildings</i>	20-30 years
<i>Leasehold improvements</i>	Length of lease
<i>Motor vehicles</i>	5-7 years
<i>Office furniture and fittings</i>	3-15 years
<i>Computer hardware</i>	3-5 years

I. Employee benefits

Provision is made for benefits accruing to employees in respect of wages and salaries, annual leave, long service leave, and sick leave when it is probable that settlement will be required and they are capable of being measured reliably.

Provisions made in respect of employee benefits expected to be settled within 12 months, are measured as the amount unpaid at the reporting date at current pay rates in respect of employees' services up to that date.

Provisions made in respect of employee benefits are not expected to be settled within 12 months and are measured as the present value of the expected future cash outflows to be made by the economic entity in respect of services provided by employees up to the reporting date. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using interest rates on national government guaranteed securities with terms to maturity that match, as closely as possible, the estimated future cash outflows.

Defined contribution plans

Contributions to defined contribution superannuation plans are expensed when incurred.

m. Foreign currency

Foreign currency transactions

All foreign currency transactions during the financial year are brought to account using the exchange rate in effect at the date of the transaction. Foreign currency monetary items at reporting date are translated at the exchange rate existing at reporting date. Non-monetary assets and liabilities carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined.

Foreign operations

Assets and liabilities of the controlled entity in New Zealand have been translated into Australian currency at year-end rates of exchange, while revenue and expenses of this controlled entity have been translated at the average of rates ruling during the year. As these foreign operations are all self sustaining, profits and losses arising on translation have been brought to account directly to the foreign currency translation reserve and have not been taken to the statement of financial performance.

Notes to the financial statements for the financial year ended 31 December 2008

1. Significant accounting policies (continued)

n. Borrowings

Borrowings are recorded initially at fair value, net of transaction costs.

Subsequent to initial recognition, borrowings are measured at amortised cost with any difference between the initial recognised amount and the redemption value being recognised in profit and loss over the period of the borrowing using the effective interest rate method.

o. Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash in banks and investments in money market instruments, net of outstanding bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment purposes; these are money market instruments with short maturities (three months or less from the date of acquisition) which are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

p. Goods and Services Tax

Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), except:

- i. where the amount of GST incurred is not recoverable from the taxation authority, it is recognised as part of the cost of acquisition of an asset or as part of an item of expense; or
- ii. for receivables and payables which are recognised inclusive of GST.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables.

Cash flows are included in the statement of cash flows on a gross basis. The GST component of cash flows arising from investing and financing activities which is recoverable from, or payable to, the taxation authority is classified as operating cash flows.

q. Impairment of Assets

At each reporting date, the consolidated entity reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the consolidated entity estimates the recoverable amount of the cash-generating unit to which the asset belongs. Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the reversal of the impairment loss is treated as a revaluation increase.

r. Income Tax

Current tax

Current tax is calculated by reference to the amount of income taxes payable or recoverable in respect of the taxable profit or tax loss for the period. It is calculated using tax rates and tax laws that have been enacted or substantively enacted by reporting date. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

Deferred tax

Deferred tax is accounted for using the comprehensive balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax base of those items.

In principle, deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that sufficient taxable amounts will be available against which deductible temporary differences or unused tax losses and tax offsets can be utilised. However, deferred tax assets and liabilities are not recognised if the temporary differences giving rise to them arise from the initial recognition of assets and liabilities (other than as a result of a business combination) which affects neither taxable income nor accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries, branches, associates and joint ventures except where the consolidated entity is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with these investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period(s) when the asset and liability giving rise to them are realised or settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by reporting date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the consolidated entity expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the period

Current and deferred tax is recognised as an expense or income in the income statement, except when it relates to items credited or debited directly to equity, in which case the deferred tax is also recognised directly in equity, or where it arises from the initial accounting for a business combination, in which case it is taken into account in the determination of goodwill or excess.

s. Intangible assets

Other intangible assets are non-monetary assets other than goodwill with no physical substance, which are separately identifiable, controlled by the consolidated entity and have future economic benefits.

Where the intangible asset is deemed to have indefinite life, it is not amortised but tested for impairment at least on an annual basis. If it is deemed to have finite useful life, it is to be amortised over its useful life and tested for impairment whenever there is an indication that the asset may be impaired.

Notes to the financial statements for the financial year ended 31 December 2008

1. Significant accounting policies (continued)

t. Leased assets

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Group as lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

u. Payables

Payables are recognised when the company becomes obliged to make future payments resulting from the purchase of goods and services.

v. Principles of consolidation

The consolidated financial statements incorporate the financial statements of the company and entities controlled by the Company (its subsidiaries) referred to as “the Group” in these financial statements. Control is achieved where the company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The consolidated financial statements include the information and results of each controlled entity from the date on which the company obtains control and until such time as the company ceases to control such entity.

Consistent accounting policies are employed in the preparation and presentation of the consolidated financial statements.

In preparing the consolidated financial statements, all intercompany balances and transactions, and unrealised profits arising within the economic entity are eliminated in full.

w. Comparative amounts

When the presentation or classification of items in the financial report is amended, comparative amounts are reclassified, unless the reclassification is impracticable.

2. Critical accounting estimates and judgements

In the application of A-IFRS management is required to make judgments, estimates and assumptions about carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstance, the results of which form the basis of making the judgments. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

Judgments made by management in the application of A-IFRS that have significant effects on the financial statements and estimates with a significant risk of material adjustments in the next year are disclosed, where applicable, in the relevant notes to the financial statements.

Significant estimates and judgements are made by the Group to arrive at certain key asset and liability amounts disclosed in the financial statements. These estimates and judgements are continually being evaluated and are based on historical experience, as well as enhancements to actuarial modelling techniques.

The key areas of significant estimates and judgements and the methodologies used to determine key assumptions are set out below.

a. Uncertainty over estimate of ultimate liability arising from claims made under general insurance contracts

Provision is made at the year end for the estimated cost of claims incurred but not settled at the balance sheet date, including the cost of claims incurred but not reported to the consolidated entity.

The estimation of outstanding claim liabilities is based largely on the assumption that past developments are an appropriate predictor of the future and involves a variety of actuarial techniques that analyse experience, trends and other relevant factors. The process commences with the actuarial projection of the future claim payments and claim handling costs incurred to the reporting date. Each class of business is usually examined separately and some or all of the following will be considered for each class in projecting future claim payments:

- i. Historical trends in the development and incidence of the number of claims reported, number of claims finalised, claim payments and reported incurred costs;
- ii. Exposure details, including policy counts, sums insured, earned premiums and policy limits;
- iii. Claim frequencies and average claim sizes;
- iv. The legislative framework, legal and court environments and social and economic factors that may impact upon each class of business;
- v. Historical and likely future trends in standard inflationary pressures relating to commodity prices and wages;
- vi. Historical and likely future trends of inflationary pressures in addition to price or wage inflation, termed superimposed inflation;
- vii. Historical and likely future trends of expenses associated with managing claims to finalisation;
- viii. Reinsurance recoveries available under contracts entered into by the insurer;
- ix. Historical and likely future trends of recoveries from sources such as subrogation and third party actions; and
- x. Insurer specific, relevant industry data and more general economic data is utilised in the estimation process.

Projected future claim payments and associated claim handling costs are discounted to a present value as required using appropriate risk free discount rates. A projection of future claims payments, both gross and net of reinsurance and other recoveries, is undertaken.

Notes to the financial statements for the financial year ended 31 December 2008

2. Critical accounting estimates and judgements (continued)

This projection is typically made without bias toward over or under estimation. As such, the resulting estimate is considered to be a net central estimate of outstanding claims liabilities that has an approximately equal chance of proving adequate as not. Where possible and appropriate, multiple actuarial methods will be applied to project future claim payments. This assists in providing a greater understanding of the trends inherent in the past data. The projections obtained from various methods also assist in setting the range of possible outcomes. The most appropriate method, or even a blend of methods, is selected taking into account the characteristics of the class of business and the extent of the development of each past accident period.

Large claims impacting each relevant business class are generally assessed separately, being measured on a case by case basis or projected separately in order to allow for the possible distortive effect of the development and incidence of these large claims.

As an estimate of future outcomes, the net central estimate of outstanding claims liabilities is subject to uncertainty. This uncertainty may consist of one or more of the following components:

Modelling

The process of managing and finalising claims is a complex one. Actuarial models represent a simplification of this complex process giving rise to the possibility that the actual future outcomes may depart from the modelled outcome.

Assumption selection

Even with the perfect model, assumptions about future claim payment experience must be drawn from limited past data and are subject to sampling error.

Evolution of assumptions

Some assumptions will be subject to changes over time due to external sources, such as changes to the legislative environment and the economic environment, or internal sources such as claim management practices.

Random variation

There is a certain amount of residual randomness that drives differences between actual and expected outcomes.

Uncertainty from the above sources is examined for each class of business and expressed as a volatility of the net central estimate. The volatility for each class is derived after consideration of stochastic modelling and benchmarking to industry analysis.

The long tail classes of liability have the highest volatilities of the insurance classes as the longer average time to settle provides a greater opportunity for sources of uncertainty to emerge. Short tail classes such as Motor, Home and Contents and Property have lower levels of volatility.

As the volatility for each class of business is partially correlated with other classes, when combined across the entire company, the overall volatility will be less than the sum of the individual classes.

With an estimate of the overall volatility for general insurance business, a range of risk margins associated with a probability of the total net provision for outstanding claims liabilities proving adequate may be produced.

b. Assets arising from reinsurance contracts

Assets arising from reinsurance contracts are also computed using the above methods. In addition, the recoverability of these assets is assessed on a periodic basis to ensure that the balance is reflective of the amounts that will ultimately be received, taking into consideration factors such as counterparty and credit risk. Impairment is recognised where there is objective evidence that the company may not receive amounts due to it and these amounts can be reliably measured.

3. Actuarial assumptions and methods

a. Assumptions

The following assumptions have been made in determining the outstanding claims liabilities:

Consolidated	2008		2007	
	Short-tail	Liability	Short-tail	Liability
Weighted average term to settlement (years)	0.60	6.01	0.62	5.66
Inflation rate	2.50%	2.50%	4.50%	4.50%
Superimposed inflation rate	0.0%	5.94%	0.0%	5.94%
Discount rate	0.0%	3.46%	0.0%	6.68%
Discounted mean term (years)	0.60	5.46	0.62	4.71
Claim handling expense ratio	10.10%	10.00%	10.00%	10.00%
Risk margin	11.90%	16.70%	12.30%	16.70%

b. Processes used to determine assumptions

The valuations included in the reported results are calculated using assumptions including:

Average weighted term to settlement

The average weighted term to payment is calculated separately by class of business and is based on historic settlement patterns.

Inflation

Insurance costs are subject to inflationary pressures over time.

For the liability classes, claim costs associated with personal injuries are linked to the weekly earnings of the claimant. Medical and legal costs are subject to increases in the wages and disbursements of professionals in those fields. These standard inflationary pressures are collectively termed wage inflation for the purpose of this report.

For the motor and property classes, claim costs are related to the inflationary pressures of the materials and goods insured as well as labour costs to effect repairs. It is therefore expected that these costs will increase at a level between appropriate Consumer Price Index ("CPI") indices and wage inflation. The motor and property classes typically use an actuarial method in which the inflation assumption is implicit and incorporated in historical levels of claim development.

Superimposed inflation rate

There is a tendency for claim costs, particularly for the liability classes, to increase at levels in excess of standard inflationary pressures. This can be due to a number of factors including court awards and precedents and social and environmental pressures. This is often termed superimposed inflation and is analysed and forecast separately from wage inflation.

Discount rate

The outstanding claims liabilities are discounted at a rate equivalent to that inherent in a portfolio of risk free fixed interest securities with coupon and redemption cash flows exactly matching the projected inflation claim cash flows.

All outstanding claims liabilities are discounted to present value using a risk free rate based on Commonwealth Government bond yield curve (in Australia) and ten year government stock rate (in New Zealand).

Notes to the financial statements for the financial year ended 31 December 2008

3. Actuarial assumptions and methods (continued)

b. Processes used to determine assumptions (continued)

Expense allowance

An estimate of outstanding claims liabilities will typically incorporate an allowance for the future cost of administering the claims. This allowance is determined after analysing claim related expenses incurred by the classes of business.

Risk margin

The overall risk margin is determined allowing for diversification between classes of business and the relative uncertainty of the outstanding claims estimate for each class.

The assumptions regarding uncertainty for each class are applied to the net central estimates and the results are aggregated, allowing for diversification, in order to arrive at an overall net provision that is intended to have an 80% probability of sufficiency.

Ultimate loss ratio

This is the ratio of incurred losses to earned premium (both net of reinsurance) inherent in actual experience to date plus outstanding payments.

Effects of changes in actuarial assumptions from 31 December 2007 to 31 December 2008

Discount rates	Short tail: no change Liability: 6.75% to 3.50%	11,239
Claims inflation	Short tail: no change Liability: 10.5% to 8.5%	(3,620)
Claims handling expense ratio	No change	-
Risk margin	No change	-
Specific short tail class assumptions (Australia)		147
ICD assumptions		39
Minimum loss ratio		
Specific liability class assumptions (Australia)		
Claim numbers		(106)
PPCI assumptions		(2,297)
PCE assumptions		261
Reinsurance		(206)
Changes from PPCI to PCE for 2000 Accident Year		(1,137)
Removal of Minimum loss ratio for 2004		(5,300)
Changes in Minimum loss ratio for other years		(5,077)
Special issues claims		(1,366)
Recognition of Large Claim		687
Specific short tail class assumptions (New Zealand):		
ICD assumptions		(55)
Specific liability class assumptions (New Zealand):		
Loss ratio		(234)

c. Sensitivity analysis

The consolidated entity conducts sensitivity analyses to quantify the exposure to the risk of changes in the underlying assumptions used in the financial statements.

The sensitivity of the Group's profit and equity to key valuation assumptions is tabulated on the next page (the assumed tax rate is 30%):

		Net profit \$'000	Equity \$'000
Recognised amounts in the financial statements		8,676	74,549
Variable	Movement in variable	Movement in amount \$'000	
Average weighted term to settlement	+1 year	(2,206)	(2,206)
	- 1 year	2,284	2,284
Claims inflation rate	1.00%	3,585	3,585
	- 1.00%	(3,398)	(3,398)
Discount rate	1.00%	(3,398)	(3,398)
	- 1.00%	3,585	3,585
Minimum loss ratio	1.00%	502	502
	- 1.00%	(502)	(502)
Claims handling expenses ratio	1.00%	727	727
	- 1.00%	(727)	(727)

Notes to the financial statements for the financial year ended 31 December 2008

4. Risk management

The financial condition and operations of the consolidated entity are affected by a number of key risks including insurance risk, interest rate risk, currency risk, credit risk, market risk, liquidity risk, financial risk, compliance risk, fiscal risk and operational risk. Notes on the consolidated entity's policies and procedures in respect of managing these risks are set out in this note.

a. Objectives in managing risks arising from insurance contracts and policies for mitigating those risks

The consolidated entity has an objective to control insurance risk thus minimising substantial unexpected losses that would expose the consolidated entity to an adverse financial capital loss.

In accordance with Prudential Standards GPS 220 Risk Management and GPS 230 Reinsurance Management issued by the Australian Prudential Regulation Authority (APRA), the Board and senior management of the Group has developed, implemented and maintain a sound and prudent Risk Management Strategy (RMS) and a Reinsurance Management Strategy (REMS).

The RMS and REMS identify the Group's policies and procedures, processes and controls that comprise its risk management and control systems. These systems address all material risks, financial and non-financial, likely to be faced by the Group. Annually, the Board certifies to APRA that adequate strategies have been put in place to monitor those risks, that the Group has systems in place to ensure compliance with legislative and prudential requirements and that the Board has satisfied itself as to the compliance with the RMS and REMS.

The RMS and REMS have been approved by the Board and lodged with APRA. Key aspects of the processes established in the RMS to mitigate risks include:

- The maintenance and use of sophisticated management information systems, which provide up to date, reliable data on the risks to which the business is exposed at any point in time.
- Actuarial models, using information from the management information systems, are used to calculate premiums and monitor claims patterns. Past experience and statistical methods are used as part of the process.
- Documented procedures are followed for underwriting and accepting insurance risks.
- Reinsurance is used to limit the Group's exposure to large single claims and catastrophes.
- The mix of assets invested in is driven by the nature and term of insurance liabilities. The management of assets and liabilities is closely monitored to attempt to match the maturity dates of assets with the expected pattern of claim payments.
- The diversification of business over classes within the reinsurance portfolio, separate geographical segments and large numbers of uncorrelated individual risks seeks to reduce variability in loss experience.

b. Interest rate risk

None of the financial assets or liabilities arising from insurance or reinsurance contracts entered into by the Group are directly exposed to interest rate risk.

Insurance and reinsurance contracts are entered into annually. At the time of entering into the contract, all terms and conditions are negotiable or, in the case of renewals, renegotiable.

The Group is exposed to interest rate risk as the entities in the Group invest funds in fixed interest securities of various maturities. This exposure is closely monitored by Investment Committee. Assets and liabilities are appropriately matched in terms of type, duration and currency. At least two non executive directors and the Managing Director are elected as members of the Investment Committee. The Committee's functions include reviewing the effectiveness of the company's investment strategy, recommending specific investment action, reviewing the investment risk management statement and recommending any changes of this statement to the Board of Directors.

c. Credit risk

Financial assets or liabilities arising from insurance and reinsurance contracts are stated in the balance sheet at the amount that best represents the maximum credit risk exposure at balance date. There are no significant concentrations of credit risk.

d. Terms and conditions of insurance business

The terms and conditions attaching to insurance contracts affect the level of insurance risk accepted by the Group. There are no special terms and conditions in any non standard contracts that have a material impact on the financial statements. The Group's exposure is diversified across Australia and New Zealand. Insurance contracts written in Australia and New Zealand are subject to substantially the same terms and conditions.

e. Concentration of insurance risk

The Group's exposure to concentrations of insurance risk is mitigated by a portfolio diversified into different classes of business comprising personal and commercial markets and short and long tail classes of risk written out of Australia and New Zealand. The portfolio is controlled and monitored by the Group's Risk Management Strategy and Audit and Risk Committee. The Committee's role includes identifying and mitigating the high-level risks.

f. Terms and conditions of reinsurance contracts

The Group reinsures a portion of the risks it underwrites in order to control exposure to losses, stabilise earnings, protect capital resources and ensure efficient control and spread of underwriting risk.

The financial probity of reinsurers is determined by the UK based group reinsurance security committee which decides annually which reinsurers the group will utilise. This decision is based on the nominated reinsurers meeting a desired credit rating and performance criteria. There is flexibility for individual business units in particular circumstances to present a case to the committee to move outside this band of reinsurers.

g. Changes of interest rate in different territories

The asset/liability matching process also matches the currency of related assets and liabilities. The Group's assets and liabilities are affected by the different interest rates of the territories in which the Group operates – Australia and New Zealand. Those assets, which are interest bearing and not 100% matched, are therefore subject to the interest rate fluctuations for a number of different currencies in different proportions.

Notes to the financial statements for the financial year ended 31 December 2008

5. Profit from operations

a. Revenue

An analysis of the Group's revenue for the year is as follows:

	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Premium revenue				
Gross written premium	142,029	131,706	125,286	116,496
Movement in unearned premiums	(5,513)	(4,309)	(4,151)	(4,043)
Gross earned premiums	136,516	127,397	121,135	112,453
Reinsurance and other recoveries (note 20)	55,222	43,992	51,587	40,332
Total general insurance revenue	191,738	171,389	172,722	152,785
Investment income				
Interest and dividend revenue	11,982	11,582	11,134	10,738
Changes in net market value of investments:				
Realised	(682)	(49)	(705)	(162)
Unrealised	5,920	(3,006)	5,693	(2,904)
	17,220	8,527	16,122	7,672
Other operating income	596	399	356	323
Total Revenue	209,554	180,315	189,200	160,780

b. Profit before income tax

Profit for the year has been arrived at after charging the following:

Loss on sale of non-current assets	52	12	26	10
Finance costs				
Ultimate parent entity	180	180	180	180
Other persons	2	2	2	2
	182	182	182	182
Depreciation of non-current assets	502	550	480	512
Amortisation of non-current assets	582	584	441	363
Doubtful debts allowance				
Reinsurance receivable	172	59	160	48
Other recoveries receivable	110	157	110	157
Trade debtors	80	41	111	20
	362	257	381	225
Employee benefits				
Defined contribution plans	1,193	1,136	1,067	1,032
Other	52	34	52	34
	1,245	1,170	1,119	1,066
Rental expense relating to operating leases	1,135	1,116	1,032	986

6. Income taxes

Income tax recognised in profit or loss

	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Tax expense comprises				
Current tax expense	2,011	3,863	1,902	3,548
Adjustments recognised in the current year in relation to the current tax of prior years	-	-	-	-
Deferred tax expense relating to the origination and reversal of timing differences	1,606	(1,264)	1,580	(1,118)
Total income tax expense	3,617	2,599	3,482	2,430

The prima facie income tax expense on pre-tax accounting profit reconciles to the income tax expense in the financial statements as follows:

Net profit for the year before income tax	12,293	8,526	11,860	8,058
Income tax expense calculated at 30%	3,688	2,558	3,558	2,417
Permanent Differences				
Non deductible expenses	60	29	60	15
Allowable building allowances	(136)	(2)	(136)	(2)
Effect of different tax rates of subsidiaries operating in other jurisdictions	5	14	-	-
	3,617	2,599	3,482	2,430
Adjustments recognised in the current year in relation to the current tax of prior years	-	-	-	-
	3,617	2,599	3,482	2,430

Income tax rate used in the above reconciliation is the corporate tax rate of 30% payable by Australian and New Zealand corporate entities on taxable profits under Australian and New Zealand tax laws. There has been no change in the corporate tax rate when compared with the previous reporting period.

Income tax recognised directly in equity

Current tax assets and liabilities				
Income tax refundable	315	1,619	44	1,286
Income tax payable	-	-	-	-

Notes to the financial statements for the financial year ended 31 December 2008

6. Income taxes (continued) Temporary Differences

Taxable and deductible temporary differences arise from the following:

2008	Consolidated			
	Opening balance \$'000	Charged to income \$'000	Charged to equity \$'000	Closing balance \$'000
Gross deferred tax liabilities				
Revenue receivable	(800)	214	-	(586)

Notes to the financial statements for the financial year ended 31 December 2008

6. Income taxes (continued) Tax Consolidation System

Legislation to allow groups, comprising a parent entity and its Australian resident wholly-owned entities, to elect to consolidate and be treated as a single entity for income tax purposes was substantively enacted on 21 October 2002. This legislation, which includes both mandatory and elective elements, is applicable to the company.

The company and its wholly-owned Australian resident entity are eligible to consolidate for tax purposes under this legislation and have elected to be taxed as a single entity from 1 January 2004. The head entity within the tax-consolidated group for the purposes of the tax consolidation system is Ansvar Insurance Limited. No tax-sharing agreement has been entered into, and there is no financial effect of this consolidation on the group.

7. Key management personnel compensation

a. The directors of Ansvar Insurance Limited during the year were: Mr M.P Baird, Mr B.G. Harris, Mr D.J. Harrison, Dr B.E. Hughes, Mr J. R. Peberdy, Mr G.A. Prescott, Mr W.G. Shearn, Mr J.O. Thomas and Mr M. H. Tripp.

b. Key executives:

<i>Chief Financial Officer</i>	D. Muscari	
<i>Operations Manager</i>	P. Atkinson	(resigned 12 March 2008)
<i>Operations Manager</i>	D. Mullen	(appointed 16 June 2008)
<i>National Claims Manager</i>	W. Goodall	
<i>Human Resource Manager</i>	S. Hogan	(resigned 24 December 2008)
<i>IT Manager</i>	D. Green	
<i>Marketing Manager</i>	M. Hurley	
<i>Manager for New Zealand</i>	D. Leather	

c. The aggregate compensation of the directors and the executives specified above, being the key management personnel of the Group and the company is set out below:

	Consolidated	
	2008	2007
	\$'000	\$'000
Short-term employee benefits	1,909	1,909
Other long-term benefits	222	252
	2,131	2,161

8. Remuneration of auditors

	Consolidated		Company	
	2008	2007	2008	2007
	\$	\$	\$	\$
Auditor of the parent entity				
Audit the financial report	134,470	124,165	86,767	80,930
Other services (i)	79,219	75,842	67,774	65,715
	213,689	200,007	154,541	146,645

(i) included tax services, engagements required by regulator and other services.

9. Current receivables

	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000

	(47,600)	(3,987)	(51,587)	(39,382)	(950)	(40,332)
Net claims incurred	55,198	(8,430)	46,768	52,975	(6,911)	46,064

Current period claims relate to risks borne in the current financial year. Prior year claims relate to a reassessment of risks borne in all previous financial years.

21. Outstanding claims liabilities

a. Gross outstanding claims liabilities

	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Gross central estimate	159,578	148,461	152,511	142,248
Discount to present value	(11,102)	(15,817)	(11,102)	(15,817)
Claims handling costs	8,875	8,069	8,580	7,822
Risk margin	16,956	15,301	16,485	14,883
Gross outstanding claims liabilities	174,307	156,014	166,474	149,136
Current	65,219	54,816	57,386	47,938
Non-current	109,088	101,198	109,088	101,198
	174,307	156,014	166,474	149,136

b. Claims development table – Liability business

The following table shows the development of net undiscounted outstanding claims for the liability class relative to the current estimated of ultimate claims costs for the five most recent accident years.

Consolidated	Accident year						
	Prior \$'000	2004 \$'000	2005 \$'000	2006 \$'000	2007 \$'000	2008 \$'000	Total \$'000
Ultimate claims cost estimate							
At end of accident year		10,997	13,461	15,375	16,609	16,467	
One year later		10,519	11,992	15,127	14,106		
Two years later		9,801	11,013	10,664			
Three years later		8,128	9,055				
Four years later		7,411					
Current estimate of ultimate claims cost	51,424	7,411	9,055	10,664	14,106	16,467	109,127
Cumulative net payments	28,597	2,048	2,326	1,022	1,018	214	35,225
Undiscounted central estimates	22,827	5,363	6,729	9,642	13,088	16,253	73,902
Net discount							(2,436)
Claims handling expenses							630
Allowance for expected reinsurance claims							7,146
Risk margin							14,688
Net liability class outstanding claims							93,930
Net short tail outstanding claims							22,036
GST input tax credits associated with outstanding claims							-
Net outstanding claims liabilities							115,966
Reinsurance and other recoveries on outstanding claims							58,341
Gross outstanding claims liabilities							174,307

Prior years central estimate consists of a specific allowance of \$16.094 million for Special Issues claims which are a subset of the Liability class and are characterised by different reporting patterns to the standard liability claim in that a very long delay is often seen between the incident date and the date reported to the insurer.

Notes to the financial statements for the financial year ended 31 December 2008

21. Outstanding claims liabilities (continued)

c. Reconciliation of movement in discounted outstanding claims provision and reinsurance recoveries

Consolidated	2008			2007		
	Gross \$'000	Reinsurance and other recoveries \$'000	Net \$'000	Gross \$'000	Reinsurance and other recoveries \$'000	Net \$'000
At 1 January	156,013	51,623	104,390	124,771	32,723	92,048
Increase due to claims incurred in current accident year	114,159	53,812	60,346	102,651	45,350	57,301
Movement in prior year claims provisions	(4,681)	3,605	(8,286)	(6,785)	410	(7,195)
Claim payments/recoveries	(90,879)	(50,535)	(40,344)	(64,038)	(26,845)	(37,193)
Foreign exchange	(305)	(165)	(140)	(585)	(15)	(570)
At 31 December	174,307	58,341	115,966	156,014	51,623	104,391

22. Unearned premium and deferred insurance costs

a. Unearned premium

Consolidated	2008			2007		
	Gross \$'000	Reinsurance \$'000	Net \$'000	Gross \$'000	Reinsurance \$'000	Net \$'000
At 1 January	77,261	28,911	48,350	73,036	22,120	50,916
Premiums on contracts written	142,906	54,361	88,545	131,707	48,151	83,556
Earning of premiums written	(137,336)	(51,026)	(86,310)	(127,356)	(41,305)	(86,052)
Foreign exchange differences	(493)	(233)	(260)	(126)	(55)	(71)
At 31 December	82,338	32,013	50,325	77,261	28,911	48,350

Company	2008			2007		
	Gross \$'000	Reinsurance \$'000	Net \$'000	Gross \$'000	Reinsurance \$'000	Net \$'000
At 1 January	68,911	24,981	43,930	64,868	18,689	46,179
Premiums on contracts written	126,106	45,895	80,211	116,496	40,349	76,147
Earning of premiums written	(121,955)	(43,384)	(78,571)	(112,453)	(34,058)	(78,395)
At 31 December	73,062	27,492	45,570	68,911	24,980	43,931

b. Deferred insurance costs

Consolidated	2008		2007	
	Acquisition costs \$'000	Fire service levy \$'000	Acquisition costs \$'000	Fire service levy \$'000
At 1 January	11,632	4,588	9,510	4,706
Costs deferred in the year	12,139	8,346	11,009	6,770
Amortisation charged to income	(9,985)	(7,728)	(8,052)	(6,888)
Write down for premium deficiency (note 23)	(1,601)	-	(821)	-
Foreign exchange differences	(74)	-	(14)	-
At 31 December	12,688	5,206	11,632	4,588

Company

At 1 January	10,239	4,588	8,172	4,564
Costs deferred in the year	10,189	8,346	9,548	6,912
Amortisation charged to income	(7,803)	(7,728)	(6,910)	(6,888)
Write down for premium deficiency (note 23)	(1,168)	-	(571)	-
At 31 December	11,457	5,206	10,239	4,588

23. Unexpired risk liability

The unearned premium liability in respect of the domestic portfolio was found to be deficient as at 31 December 2008. The entire deficiency of \$1.601 million (Group)/\$1.168 million (Company) was recognised. As at 31 December 2007 the entire deficiency of \$821 thousand (Group)/\$571 thousand (Company) was recognised. In recognising the deficiency the Company and the Group wrote down the related deferred acquisition costs. No additional liability was required to be recognised in the balance sheet.

The probability of sufficiency ("POS") adopted in performing the liability adequacy test is set at the 80th percentile which is the same as that adopted in determining the outstanding claims liabilities ("OCL").

The POS for OCL is set at a level that is appropriate and sustainable to cover the Company's and the Group's claims obligations after having regard to the prevailing market environment and prudent industry practice.

Being a test of adequacy, the POS for the liability adequacy test ("LAT") is set to highlight deficiencies in product pricing following an analysis of the Group's profit margins that equates to the Group's cost of capital after having regard to regulatory minimum requirements.

Notes to the financial statements for the financial year ended 31 December 2008

23. Unexpired risk liability (continued)

Calculation of deficiency	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Unearned premium liability relating to insurance contracts issued	19,959	18,146	17,694	15,994
Related reinsurance asset	-	-	-	-
Related deferred acquisition costs	(3,978)	(3,514)	(3,328)	(2,890)
	15,981	14,632	14,366	13,104
Central estimate of present value of expected future cash flows arising from future claims on insurance contracts issued	16,129	14,189	14,081	12,411
Risk margin of 9.01% (Group)/10.32% (Company)	1,453	1,264	1,453	1,264
Present value of expected future cash flows arising from reinsurance recoveries on future claims	-	-	-	-
	17,582	15,453	15,534	13,675
Net deficiency	(1,601)	(821)	(1,168)	(571)
Add back reinsurance element of present value of expected future cash flows for future claims	-	-	-	-
Gross deficiency	(1,601)	(821)	(1,168)	(571)

The liability test has identified a surplus for other portfolios of contracts that are subject to broadly similar risks that are managed together as a single portfolio.

The process of determining the overall risk margin, including the way in which diversification for risks has been allowed for is discussed in note 3.

24. Employee benefits

The aggregate employee benefits recognised and included in the financial statements is as follows:

Current provision for employee benefits (note 18)	1,009	1,016	916	941
Non-current provision for employee benefits (note 18)	722	614	722	614
Aggregate employee benefits	1,731	1,630	1,638	1,555
Number of employees at end of financial year	155	142	131	117

25. Commitments

Operating lease commitments:

Not later than one year	1034	972	872	865
Later than one year and not later than five years	2,569	1,394	1,952	1,372
Later than five years	-	-	-	-
	3,603	2,366	2,824	2,237

26. Share capital

	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Issued share capital 5,000,000 ordinary shares each fully paid (2007: 5,000,000)	5,000	5,000	5,000	5,000

Ordinary shares carry the right to dividends and one vote per share.

Changes to the then Corporations Law abolished the authorised capital and par value concept in relation to share capital from 1 July 1998. Therefore, the company does not have a limited amount of authorised capital and issued shares do not have a par value.

27. Reserves

Foreign currency translation reserve	(507)	(11)	-	-
Assets revaluation reserve	421	326	421	326
	(86)	315	421	326

a. Foreign currency translation reserve

Balance at the beginning of financial year	(11)	86	-	-
Translation of the assets and liabilities of foreign operations	(496)	(97)	-	-
Balance at the end of financial year	(507)	(11)	-	-

b. Assets revaluation reserve

Balance at the beginning of financial year	326	326	326	326
Revaluation increments	135	-	135	-
Deferred tax liabilities arising from revaluation	(40)	-	(40)	-
Balance at the end of financial year	421	326	421	326

28. Retained Profits

Balance at beginning of financial year	64,082	61,150	55,967	53,334
Net profit	8,676	5,927	8,378	5,628
Dividend declared	(3,123)	(2,995)	(3,123)	(2,995)
Balance at end of financial year	69,635	64,082	61,222	55,967

Notes to the financial statements for the financial year ended 31 December 2008

29. Financial instruments

a. Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which revenues and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in note 1 of the financial statements.

b. Financial risk management objectives

It is ultimately the responsibility of the board of directors to ensure that there is an effective risk management control framework in place. Consistent with regulatory requirements the board has explicitly allocated to the Managing Director, the function of overseeing the establishment and maintenance of risk-based systems and controls across the Group.

As part of the overall governance framework the Group has established a number of board and management committees to oversee and manage financial risks, which are described in note 4 to the financial statements.

The Group has assessed the effectiveness of the controls in place to mitigate the risks and implemented appropriate policies for managing these risks. In order to establish the parameters within which risk must be managed, the Group has also developed a statement of 'risk appetite', or tolerance. Both the risk policies and risk appetite are subject to an annual review to ensure that they reflect the changing risk profile of the business.

c. Categories of financial instruments

	Note	Consolidated		Company	
		2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Financial assets					
Cash and cash equivalents		23,589	23,637	20,356	22,044
Fair value through profit or loss		176,277	153,674	167,725	157,122
Loans and receivables		155,798	144,579	140,310	130,209
Financial liabilities					
Payables		17,852	18,698	16,022	16,890
Interest bearing liability		3,000	3,000	3,000	3,000

Financial assets carried at fair value through profit or loss have been designated as such upon initial recognition.

d. Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the company. The Group has adopted the policy of only dealing with creditworthy counterparties and obtaining sufficient collateral or other security where appropriate, as a means of mitigating the risk of financial loss from defaults. The policies and procedures in place to mitigate the Group's exposure to credit risk are described in note 4 of this financial report.

The Group does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The table below shows the maximum exposure to credit risk for the components of the balance sheet. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting or taking account of the value of any collateral or other security obtained.

Financial assets	Note	Consolidated		Company

- (i) The Group and the company classify all assets with Standard and Poors credit ratings of AAA to BBB as investment grade.
- (ii) Non-investment grade (satisfactory) assets include assets that fall outside the range of AAA to BBB Standard and Poors credit rating as well as non-rated assets that are within the risk parameters outlined by the Group's risk management policy.
- (ii) Non-investment grade (unsatisfactory) assets include assets that fall outside the risk parameters outlined by the Group's risk management policy and assets that would otherwise be past due or impaired whose terms have been renegotiated.

Notes to the financial statements for the financial year ended 31 December 2008

29. Financial instruments (continued)

e. Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial instruments. Ultimate responsibility for liquidity risk management rests with the board of directors, that has built a liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves and by continuously monitoring forecast and actual cash flows and matching the maturity profiles of assets and liabilities. As required by APRA Prudential Standard GPS 220, the Group has developed and implemented a Risk Management Strategy, which is described in note 4. The Group's overall strategy in liquidity risk management remains unchanged from 2007. The Group and the company have no significant concentration of liquidity risk.

The following tables summarise the maturity profile of the company's and the Group's financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay, except for outstanding claims liabilities, where maturity profiles are determined on the discounted estimated timing of net cash outflows.

The tables include both interest and principal cash flows. The adjustment column represents the possible future cash flows attributable to the instrument included in the maturity analysis which are not included in the carrying amount of the financial liability on the balance sheet.

Consolidated	Weighted average interest rate %	Less than 1 year \$'000	1-5 years \$'000	5+ years \$'000	Adjustment \$'000	Total \$'000
2008

f. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign exchange (currency risk), market interest rates (interest rate risk) and market prices (price risk). The Group's policies and procedures put in place to mitigate the Group's exposure to market risk are described in note 4 to this financial report. There has been no change to the Group's exposure to market risks or the manner in which it manages and measure the risk.

Interest rate risk management

The Group's activities expose it to the financial risk of changes in interest rates. Floating rate instruments expose the Group to cash flow risk, whereas fixed interest rate instruments expose the Group to fair value interest rate risk. The Group's Investment Committee monitors the Group's and the company's exposures to interest rate risk as described in note 4 to this financial report.

The company's and the Group's exposures to interest rates on financial liabilities are detailed in the liquidity risk section of this note.

The following tables detail the company's and the Group's expected maturity for its financial assets. The tables below have been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets except where the company or Group anticipates that the cash flow will occur in a different period. The adjustment column represents the possible future cash flows attributable to the instrument included in the maturity analysis which are not included in the carrying amount of the financial asset on the balance sheet.

Insurance and reinsurance assets are not financial assets for purposes of disclosures relating to financial instruments.

Notes to the financial statements for the financial year ended 31 December 2008

29. Financial instruments (continued)

f. Market risk (continued)

Interest rate sensitivity

The sensitivity analyses below have been determined based on the exposure to interest rates at the reporting date and the stipulated change taking place at the beginning of the financial year and held constant throughout the reporting period. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the possible change in interest rates.

At reporting date, if interest rates had been 50 basis points higher or lower and all other variables were held constant, the Group's:

- net profit would increase/decrease by \$1.260 million (2007: decrease/increase by \$750 thousand). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings. All other equity reserves would have been unaffected.

Foreign currency risk management

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Group is mainly exposed to New Zealand dollars via its subsidiary in New Zealand. The Group's financial assets are primarily denominated in the same currencies as its insurance contract liabilities, which mitigates the foreign currency exchange risk for the overseas operations in New Zealand. Exchange rate exposure is managed in line with the Group's Risk Management Statement as described in note 4. The Group's overall strategy in foreign currency risk management remains unchanged from 2007.

Other price risks

The Group is exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The Group does not actively trade these investments.

Equity price sensitivity

The sensitivity analyses below have been determined based on the exposure to equity price risks at the reporting date.

At reporting date, if the inputs to the valuation model had been 25% higher/lower while all other variables were held constant:

- net profit would increase/decrease by \$582 thousand as a result of the changes in fair value of equities designated as at 'fair value through profit or loss';
- other equity reserves would have been unaffected.

30. Related party disclosures

Related parties of Ansvar Insurance Limited fall into the following categories:

Controlled entities

Information relating to controlled entities is set out in note 31.

Ultimate parent entity

The ultimate parent entity in the wholly owned group is Allchurches Trust Limited, incorporated in the UK.

The immediate parent entity of the Group is Ecclesiastical Insurance Office Plc.

The parent entity in the economic entity is Ansvar Insurance Limited.

Directors

The names of persons who were directors of the parent entity during the financial year and their remuneration are set out in note 7.

Mr G. A. Prescott and Mr. M. H. Tripp were directors of Ecclesiastical Insurance Office plc, the immediate parent entity of Ansvar Insurance Limited during the year.

Other Transactions with Directors

The profit from ordinary activities before income tax includes the following items of revenue and expense that resulted from transactions with directors or their director related entities:

	Consolidated		Company	
	2008	2007	2008	2007
Purchase of legal services from Moores Legal	13,760	5,453	13,760	5,453
Sponsorship payments to Willow Creek Australia	38,500	-	38,500	-

The above transactions were made on commercial terms and conditions and at market rates.

Wholly owned group

The wholly owned group consists of Allchurches Trust Limited and its wholly owned controlled entities, including Ansvar Insurance Limited and its controlled entities. Ownership interests in these controlled entities are set out in note 31.

During the financial year Ecclesiastical Insurance Office plc provided a long term loan to Ansvar Insurance limited. Interest is payable on this loan.

Other transactions between Ansvar Insurance Limited and related parties in the wholly owned group during the years ended 31 December 2008 and 31 December 2007 consisted of loans advanced by Ansvar Insurance Limited to its controlled entities. There was no interest payable on these loans.

The Parent of Ansvar Insurance Limited has agreed to act on behalf of the Group to obtain a portion of re-insurance cover from external parties at prevailing market terms and conditions. Under the terms of this agreement, the Parent will be reimbursed or will refund the net liability or net asset position of this reinsurance cover at the nominated frequency.

Notes to the financial statements for the financial year ended 31 December 2008

30. Related party disclosures (continued)

Wholly owned group (continued)

Aggregate amounts receivable from or payable to entities in the wholly owned group at balance date were as follows:

	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Current unsecured receivable from controlled entities	-	-	161	122
Current unsecured payable to parent entity	316	153	211	84
Current interest bearing liability payable to parent entity	3,000	-	3,000	-
Non-current interest bearing liability payable to parent entity	-	3,000	-	3,000

Ansvar Insurance Limited pays for certain operating expenses on behalf of Ansvar Insurance Limited (New Zealand); these costs are charged back to the subsidiary. During the year a total of \$899 thousand was charged back (2007: \$815 thousand).

31. Controlled entities

Name of Entity	Country of incorporation	Ownership Interest	
		2008 %	2007 %
Ansvar Insurance Limited**	New Zealand	100	100

** Audited by a member firm of Deloitte Touche Tohmatsu

32. APRA capital adequacy

The following information refers to APRA's capital adequacy requirements and calculations of capital and some other balances are based on different methodologies from those used to prepare this financial report.

	2008 \$'000	2007 \$'000
Tier 1 Capital	75,517	73,242
Less: Net deferred tax assets	(3,317)	(3,794)
Other intangible assets	(410)	(487)
Other deductions required by APRA	(500)	(500)
Adjusted Tier 1 Capital	71,290	68,461
Tier 2 Capital	789	1,347
Total Capital Base	72,079	69,808
Minimum capital requirement (MCR)	32,273	28,646
MCR ratio	223.34%	243.69%

33. Notes to the cash flow statement

a. Reconciliation of cash and cash equivalents

For the purposes of the cash flow statement, cash includes cash on hand and in banks and investments in money market instruments, net of outstanding bank overdrafts. Cash and cash equivalents at the end of the financial year as shown in the cash flow statement is reconciled to the related items in the balance sheet as follows:

	Consolidated		Company	
	2008 \$'000	2007 \$'000	2008 \$'000	2007 \$'000
Cash	9,711	12,622	9,711	11,197
Add: short term deposits (i)	13,978	11,015	10,645	8,847
Less: bank overdraft	(100)	-	-	-
	23,589	23,637	20,356	20,044

- (i) money market instruments that qualify as cash equivalents under the Group's accounting policies: have short maturities (three months or less from the date of acquisition), are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

b. Reconciliation of profit for the year to net cash flows from operating activities

Profit for the year	8,676	5,927	8,378	5,628
Depreciation and amortisation	1,084	1,134	921	876
Doubtful debts	362	257	381	225
Changes in fair value of investments	(5,238)	3,055	(4,988)	3,066
Dividends Received	(240)	(190)	(240)	(190)
Rentals received	-	-	(59)	(57)
Loss on sale of assets	52	12	26	10
Decrease in current tax liabilities	-	(1,753)	-	(1,753)
Decrease in current tax assets	(315)	(1,619)	(44)	(1,286)
Decrease/(increase) in deferred tax balances	1,651	(1,188)	1,620	(1,118)
Changes in operating assets and liabilities:				
Increase in trade debtors	(2,106)	(3,808)	(1,181)	(3,809)
Increase in reinsurance recoveries receivable	(1,169)	(16,302)	(749)	(14,950)
Increase in other debtors	(3,131)	(1,865)	(3,787)	(1,284)
Increase in deferred insurance costs	(4,777)	(8,794)	(4,348)	(8,382)
Increase/(decrease) in net amount due to related entities for operating activities	163	(288)	88	(267)
Decrease in sundry creditors and accruals	(232)	(706)	(176)	(684)
Increase in unearned premiums	5,077	4,225	4,151	4,043
Increase in outstanding claims	18,293	31,243	17,338	28,815
Increase in provision for employee benefits	101	210	83	194
Increase/(decrease) in direct insurance payables	182	(292)	56	(308)
Increase/(decrease) in reinsurance ceded creditors	620	(540)	572	(295)
(Decrease)/increase in indirect taxes	(440)	29	(431)	130
Increase in deferred reinsurance and other revenue	881	2,713	758	2,594
Increase in other operating provisions	75	-	55	-
Net cash flow from operating activities	19,569	11,460	18,423	11,197

Notes to the financial statements for the financial year ended 31 December 2008

34. Subsequent events

There have been no subsequent events noted.

35. Adoption of new and revised Accounting Standards

In the current year, the company has adopted all of the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (the AASB) that are relevant to its operations and effective for the current annual reporting period.

At the date of authorisation of the financial report, the following Standards and Interpretations were in issue but not yet effective:

Revised AASB 101 'Presentation of Financial Statements' – revised standard	Effective for annual reporting periods beginning on or after 1 January 2009
Revised AASB 132 'Financial Instruments: Presentation'	Effective for annual reporting periods beginning on or after 1 January 2009
Revised AASB 127 'Consolidated and Separate Financial Statements'	Effective for annual reporting periods beginning on or after 1 January 2009
